

TEACHING EVALUATIONS – ANDREW KOBIN

Information for all courses, including syllabi and other teaching materials for select courses, are available at [my teaching page](#).

Year	Term	Course	Enrollment	Instructor	Course	Comments
2016	Fall	Math 1210	37	8.1	7.8	
2017	Spring	Math 1220	41	7.8	6.6	
	Fall	Math 1210	45	6.3	6.2	
2018	Spring	Math 1320	37	8.3	7.4	
	Fall	Math 1310	24	8.6	7.2	flipped
2019	Spring					dissertation semester
	Fall	Math 1320	25	8.1	6.5	flipped
2020	Spring	Math 1140	40	8.5	N/A	partially online
	Summer	Math 1310	24	N/A	N/A	flipped, online
	Fall	Math 227	9	N/A	N/A	graduate, online
2021	Winter	Math 11B	325	N/A	N/A	online
	Spring	Math 111T	20	N/A	N/A	online
		Math 117	30	N/A	N/A	online
	Fall	Math 221	23	7.1	7.2	
			23	7.8	7.8	
2022	Spring	Math 210	16	7.3	6.9	flipped, partially online
			19	7.6	7.5	flipped, partially online
	Fall	Math 328	14	8.8	8.8	
		Math 211	38	8.2	7.9	
2023	Spring	Math 210	34	7.5	7.3	flipped
			31	7.9	7.7	flipped
		Math 422	4	8.2	8.4	
Total			859	7.9	7.4	

Notes:

- (1) “Instructor” column is a weighted mean instructor score, out of 9.
- (2) “Course” column is a weighted mean course score, out of 9.
- (3) Scores listed as “N/A” were either not collected or not scored on a numerical scale.

Selections from Recent Student Evaluations

Math 422 - Algebra II, Spring 2023

“Prof. Kobin is very kind and patient in office hours. He also values student feedback and adjusts the course based on the feedback.”

“He is very nice and passionate about course material. He is very accessible and supportive through emails and office hours.”

“I would recommend Dr Kobin If someone wanted to become a better mathematician I do think you learn and grow a lot from his style of teaching.”

Math 210 - Advanced Calculus for Data Science (flipped classroom), Spring 2023

“I LOVED taking this class with Kobin. He actually knows how to teach, is really friendly and approachable, and cares about student learning. I also found the class really well organized and I liked how he assigned lectures/coursework.”

“Dr. Kobin explains concepts very succinctly and has very generous office hours. He is very adaptable and flexible to student needs and I appreciate his accomodation for extension requests.”

“Dr. Kobin is extremely caring and responsive. He got to know each of us personally and was very efficient in returning our work.”

“I love the setup of class, where lectures are posted before a class meeting. I can take as much time I need to really grasp the content, and during class meetings, the class works in smaller groups (or individually) for part of the time before discussing questions as one whole class. He gives the students time to work through questions instead of just showing us how and giving us the answers. He is also energetic (quite difficult for an 8:30 AM class).”

“The fact that the instructor would assign optional weekly reflection on the course to improve the later class is something really matters a lot. Personally, I have seen my suggestion being taken in the class by the instructor in the following week of class which is something really inspiring and motivating for a student.”

“Prof. Kobin is a great and fair professor. He genuinely cares about what we are taking from the class and whenever he’s going around the class to ask if we need any help with the questions, he always asks what we think first. For me this allowed me to see the extent to which I undertsood the topic He can really read the room, so when he sees a lot of confused faces starrng at him he is willing to go back to the basics and explain everything from the beginning which is something a lot of student appreciated. I also liked how he memorized everyone’s names.”

Math 211 - Advanced Calculus (Multivariable), Fall 2022

“The instructor was very sociable, and seems to understand us as students. I’m not sure of any weaknesses that come to mind.”

“Instructor teaches very coherently and doesn’t go too fast. He is amazing.”

“the professor is great. he is super enthusiastic, willing to answer all questions and makes sure we are all on track and happy with the material. He always gives really calming reassuring speeches before any quiz or test which helps so so much. he emphasizes that we are doing great and that if we struggle it is ok. he is always available to answer questions and is always cheerful! Andrew has been one of my favorite professors so far.”

“Andrew Kobin is great. he responds genuinely and helpfully to questions and makes sure nobody gets left behind. Also the class was well structured with quizzes and homework. And finally the lectures were usually a good mix of definitions and example.”

Math 328 - Number Theory, Fall 2022

“The instructor was amazing! Dr. Kobin knows the material extremely well, is passionate, patient, and kind. The only weakness is he is so good, that I wish he was more accessible outside of class lol.”

“Professor Kobin is one of the best professors I’ve had at Emory. He genuinely cares about the success of each student and reaches out when they are struggling. His lectures are extremely engaging and he has the most DETAILED, AMAZING notes on the topics for students to review after class.”

“Prof. Kobin is very knowledgeable, responsible, and caring for his students.”

Math 210 - Advanced Calculus for Data Science (flipped classroom), Spring 2022

“Very dedicated, very clear in explaining concepts, clearly a seasoned professional.”

“Strength: Dr. Kobin is perfect (understandable, effective at teaching, available outside of the class, answer clearly all questions I have...) No weakness.”

“Dr. kobin has been really helpful during the course. He explains our questions clearly during the discussion.”

“Th instructor is really good and approachable. He explains concepts very well.”

“Our professor was always willing to help and seemed to really care that we understood the topics.”

“I would definitely recommend this course and instructor.”

Math 221 - Linear Algebra, Fall 2021

“The professor was super nice and very knowledgeable about the topic. He is pretty reachable and answer questions very clearly.”

“He is very enthusiastic about the course material and explains things very clearly, making it pretty easy for us to understand.”

“Explains concepts very thoroughly. Has a nice demeanor and is enjoyable to talk to and ask questions to.”

“The professor is very knowledgeable, and he definitely knows the material he teaches, and he cares a lot about his students. He is able to connect the information I learned from calculus, functions, and algebra to linear algebra, which is amazing!! the only weakness he has is that his class is really abstract.”
